

RAMON MORILLAS SELLS HIS OMEGA 7 AND PAP ENGINE FROM HIS 1.105 KM PARAMOTOR WORLD RECORD.

To be able to possess a small part of the big history of paragliding is a dream for most of us. When this history concerns such a unique and exceptional person as the Spanish pilot Ramon Morillas, there is no reason to hesitate to invest. Ramon is not only a great paragliding champion, but also a paramotor champion (4^o world champion), and world record holder. His latest record is of course his unbelievable flight of 1105 km above the Atlantic ocean, linking Spain with the Canary Islands, in April 2007. He also recently took part in the X-Alps race and finished at an outstanding 7th position !

Ramon's record-winning Advance Omega 7 wing and Pap engine are to be put up for auction. Bids must be sent by end of October to Draco draco@draconexion.com. The starting price is 4000 Euros for the wing, and 4500 Euros for the engine.

The successful bidder will spend 2 days in Granada with Ramon to meet him personally and to take delivery of the products. Also included in the package will be a complete file of the flight, a CD with pictures, the video of the flight and a certificate of authenticity. A unique occasion to have at home a part of a unique person. Thanks a lot Ramon for all you do.
